

Data Flow Diagram

Date	28 June 2026
Team ID	xxxxxx
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person or system outside the project that sends or receives data. In our project: User (Policy Maker / Researcher / Student) who submits country indicators and receives the HDI prediction result
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data. In our project: Process 1 — Input Handling, Process 2 — ML Prediction, Process 3 — Classification
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use. In our project: HDI Input Datastore (stores form inputs) and HDI Result Datastore (stores prediction output)
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores. In our project: form inputs → validation → HDI.pkl model → predicted score → result page

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.

HDI Predictor — Data Flow Diagram
