Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 - Awareness	Stage 2 - Interaction	Stage 3 - Result
Actions <i>What does the customer do?</i>	• User hears about HDI and wants to know their country's score. • Searches online for an HDI prediction tool. • Finds and opens our web application.	• Open the Prediction page. • Selects country indicators from the form • Enters Life Expectancy, Schooling years, GNI values	• Clicks the Predict button . • Views the predicted HDI score and category . • Decides to re-enter values for another country.
Touchpoint <i>What part of the service do they interact with?</i>	• Home page (home.html) • Project description section • "Predict HDI Now" button	• Prediction form page (indexnew.html) • Live HDI score estimator • Input fields and dropdown	• Result page (resultnew.html) • HDI score display • Category classification (Low/Medium/High/Very High)

Customer Thought <i>What is the customer thinking?</i>	• "I wonder what HDI score my country has" • "Can this tool give me accurate results?" • "This looks easy to use"	• "Which values should I enter for my country?" • "The live score estimator is helpful" • "Let me try different values to compare"	• "The prediction matches what I expected" • "Now I understand my country's development level" • "I should try this for other countries too"
Customer Feeling <i>What is the customer feeling?</i>	• Curious and interested	• Engaged and focused	• Satisfied and informed
Process Ownership <i>Who is in the lead on this?</i>	• Rohit (Team Lead) (Home page design)	• Rohit - (Prediction form development)	• Rohit- (Result page and model output)
Opportunities <i>How can we improve this stage?</i>	• Add more country examples on home page • Improve visual design to attract users • Add video demo of how to use the tool	• Add tooltip hints for each input field • Add sample values button for quick testing • Show real-time validation for input ranges	• Show bar chart comparing country vs world average • Add option to download prediction report • Allow sharing result on social media
